## **TO ALL DEVELOPERS**

### **SWMSP: Storm Water Management Site Plan Pre-application Conference**

Development submittals that will result in a project that:

- disturbs a surface area of 12,000 square feet or more

must include a preliminary Storm Water Management Site Plan. See Article V of Subdivisions Regulations at [www.ci.arlington.tx.us/planning](http://www.ci.arlington.tx.us/planning) and the Design Criteria Manual at [www.ci.arlington.tx.us/publicworks](http://www.ci.arlington.tx.us/publicworks) for specific requirements.

The developer or engineer for sites one acre or larger must attend a pre-application conference with Environmental Services prior to submitting the plat. Conferences are scheduled in 30 minute increments each Tuesday morning in the Department of Public Works' second floor conference room from 9 am to noon.

To schedule a conference, send your preferred date and time to [envpreplat@ci.arlington.tx.us](mailto:envpreplat@ci.arlington.tx.us).

Suggested items to bring to the pre-application conference are

- ✓ proposed development plan,
- ✓ site survey, and
- ✓ other documents that describe the existing site and proposed changes.
